

The Creat Blood Purifier, Kidney and Liver Regulator.

The original and only genuine herb compound.

Every agent for this matchless remedy should redouble his efforts in the next two months, as indications point toward a sickly Spring, and they should use every effort to place a box of "OUR NATIVE HERBS" in every house in their territory. You old experienced ones know that March and April are two of the best months in the year for cur business, and we want you to put forth your best efforts and see how many boxes of medicine you can sell. We are supplying you with better literature and more of it than ever before, and as "OUR NATIVE HERBS" is known from one end of the country to the other as the best medicine on the market, you will experience no difficulty in selling two boxes of our medicine to one of your competitors, and if you handle the business nicely and distribute the literature, you will have no competition. You were warned last week to get in a good stock, and a good many took advantage of our advice, several ordering by telegraph. We are always glad to receive orders, but we do not think an agent should let his stock get so low that he finds it necessary to telegraph for goods; however, let them come; we are prepared to take care of them. We have been advising you recently to canvass. Possibly you think we should not be so persistent about it. Now to convince those who are skeptical as to the merits of that branch of the agency business, we publish statements from two of our agents. Both of them have built up their trade by CANVASSING. Either is a good example for you to follow.

Two Agents Who Profited by Our Advice.

Gentlemen: It gives me pleasure to say that the people of Florida are firm bellevers in the curative properties of "OUR NATIVE HERBS." Every one who has used it reports a great benefit derived. I canvassed three days last week and sold THIRTY-TWO (32) EOXES, which I think is doing very well in a thinly settled territory. Your idea of having every return card sent to you is a good one, and inspires confidence in the purchaser—they realize you have their best interest at heart and want to effect a cure in their individual case. I intend devoting all my time to the agency from now on, and expect to make a better showing in the Prize Contest this year than I did last. It has always been my experience that the best method to pursue in selling "OUR NATIVE HERBS" is to CANVASS, do not miss a single house, go inside, and tell the people in plain, straightforward language what "OUR NATIVE HERBS" is, the various diseases it successfully copes with, the time it has enjoyed the confidence of the entire world, and how its sales have increased. Tell them of the people in their own neighborhood who are being cured by it, if you do not have any special Health Reports with you. Impress upon them that a few doses of "OUR NATIVE HERBS" will often save a large doctor's bill. As a majority of the people in my section are in moderate circumstances, very often they say: "I haven't got the money," then I offer to take farm produce, such as chickens, eggs, and butter in exchange. I allow them market prices for them, and find no trouble in disposing of them at the next town. By doing this I sell dozens of boxes I would miss if I did business for cash only. Your idea of printing the price on each yellow package and stamping them was a good one, and it will help me very much. When I approach a man now and he wants a single package, I can very often persuade him to take a dollar box by using the following argument: "Why not take a whole box, by doing so, you will save 50 cents and get a dose glass and a guarantee binding the company and my

Gentlemen: In one-half a day last week I sold TWENTY-FOUR BOXES OF "OUR NATIVE HERBS." EACH ONE TO A DIFFERENT PERSON AND FOR Gentlemen: In one-half a day last week I sold TWENTY-FOUR BOXES OF "OUR NATIVE HERBS." EACH ONE TO A DIFFERENT PERSON AND FOR ONE (II) DOLLAR. It is too bad I could not get down to good work last year; if I had done so I feel certain I would have captured one of the prizes. At any rate you may count on my making a great effort for one this season. Business with me is booming. I have just given my County a thorough canvassing, according to your instructions, left a book and Health Report at every house. My good sales are a result of your advice and I thank you for it. I 'ntend to canvass Carroll County regularly, and know I can sell medicine enough to make a handsome living. "OUR NATIVE HERBS" does all and more than you claim for it. A few days ago I found a fellow traveling through my county pretending he was selling "OUR NATIVE HERBS." He was selling a liquid put up in pint bottles and retailed it for 50 cents per bottle. It did not look like "OUR NATIVE HERBS." neither did it give satisfaction; it made the user sick. Do you know anything about this? My sales are increasing every day and I have a young man who will start to canvassing for me just as soon as my goods reach here. I am very careful to explain to my customers that they must follow the directions implicitly; if they want to be cured they should take the medicine regularly, as long as the slightest taint of disease remains in the system. Some of them take it a few days and expect a permanent cure for a malady from which they have suffered for years. This is all wrong, and the man or woman who wants to be cured must follow the directions. It is a very good plan, I find, to go over my territory often, call on the people I have soid to, and see how they are getting on. It always pays me, because some of them will be sure to tell me to call on some friend or relative who wants a box of medicine, and again, I get first-class testimonials on these second trips, and they go a long way toward convincing others to a "OUR NATIVE HERBS" is GOOD. In closing I w

CONVERSATIONAL.

Judging from Mr. Malphurs' letter, things are booming in Florida. The people of that State know a good medicine when it is brought to their attention in the right way, and do not hesitate to buy and recommend it to their friends. Mr. Malphurs is one of our energetic workers and does not leave a stone unturned in his efforts to increase the popularity of "OUR NATIVE HERBS." and, incidentally, his income. His gross profits for three days' work were \$8.24, or over SIX DOLLARS A DAY. That seems like a great deal of money for a man to make selling medicine, but it can be and is being done right along by our representatives. You can do just as well as this if you will only try. Do not get discourged at the first setback you encounter; we all have them and must learn to overcome them. Mr. Malphurs lost his horse last summer. Do you suppose he stopped work on account of that? He did nothing of the kind. He canvassed on foot until he was able to buy another horse, and started out in good shape once more. His idea of exchanging medicine for produce is a very good one, and is being worked to advantage by scores of our representatives; no doubt it would be an accommodation to some of your customers if you would exchange with them. Why not try it? You will find no difficulty in selling the goods at the next village, and if you can't dispose of them advantageously, take them home with you and use them yourself.

You will notice he says something about guaranteeing the medicine himself. Of course you all know we place our REGISTERED GUARANTEE in EVERY BOX of "OUR NATIVE HERBS" that we sell, but an agent's statement to the Judging from Mr. Malphurs' letter, things are booming in Florida. The people

effect that he will see that the guarantee is paid promptly, if the occasion demands it, will have a great deal of influence with some people, as they have more confidence in people they are personally acquainted with. Suppose you try this pian, too. His ideas on the single package question are sound, and the argument he puts forth for the purchase of a DOLLAR BOX is good. No agent should sell a single package if he can avoid it.

Mr. Martin is another enthusiastic worker and he reaps his reward, too, as you will see from his statement. Just think of it, THIRTEEN DOLLARS CLEAR PROFIT IN ONE-HALF A DAY! Do you know of any other business a man can engage in the small capital and make such handsome profits? We feel certain your answer will be No. This gentleman was not doing very much business last year. One day he wrote us a long letter, asking our advice, &c. We told him to get out and canvass and not to mind hard work. He had the nerve and backbone to take our advice and follow it out; now see what kind of a trade he has worked up on "OUR NATIVE HERBS" in his territory, and it is no better than the average man or woman can do if they only have the will power and determination to keep at it.

You will see he has adonted our suggestion eas to calling on his customers.

ter than the average man or woman can do it they only have the will power and determination to keep at it.

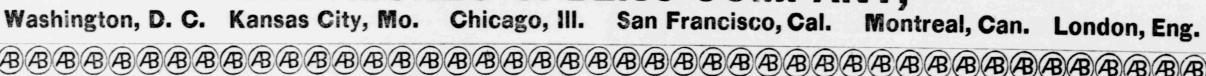

You will see he has adopted our suggestion as to calling on his customers often; that is an excellent plan and is worthy of a trial by all of you. That liquid imitation he refers to is a new one on us, and judging by the effect it is having on the users it is a good thing to let alone. For the benefit of our agents, we will say that "OUR NATIVE HERBS" is manufactured by us alone, and in only

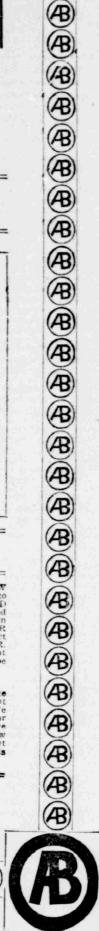

TWO FORMS—either in powder or tablets—and is always packed in A YELLOW BOX, containing either THREE small YELLOW PACKAGES of POWDER, to be mixed with cold water, a Graduated Dose Glass, and our REGISTERED GUARANTEE and RETURN CARD, or 200 TABLETS, which makes a neat and compact package for the traveler or any one who prefers to take medicine in GUARANTEE and RETURN CARD, or 200 TABLETS, which makes a neat and compact package for the traveler or any one who prefers to take medicine in tablet form. EVERY TABLET OF "OUR NATIVE HERBS" HAS OUR TRADE-MARK ON IT (the border of this announcement is composed of exact fac-similes). INSIST UPON HAVING THE GENUINE AND TAKE NO OTHER. We are happy to say that the Return Cards are coming in better, but we want you to see that every one of them gets in to us so the purchaser's name may be entered up properly.

Special Health Reports for Each State.

We are preparing special reports with local testimonial from each State printed on the back. These reports will be the best matter we have gotten out for our agents in many a long day, and we must look to them for assistance. We want you to send in as many testimonials as you can from parties from your section, and be sure to forward the parties' pictures whenever possible. Have the testimonial cover the case thoroughly, give the disease, the symptoms, how long affected, what remedies were used, how OUR NATIVE HERBS was brought to their notice, and the length of time it took for it to effect a cure. Give this your immediate attention, so we can issue these reports at an early date.

The Democratic minority of the House of Representatives held a caucus last ening and agreed upon a policy regarding the Philippines. It was practically a affair, although the speeches a which most of those present freely dulged, lasted well on toward midnight. The declaration was against permanent sovereignty over the far Eastern group, and the intention is to have the resolu brought to the attention of the House, and, if possible, adopted. A CONSPIRACY AGAINST SCHLEY

Commander-in-chief of the Fleet Apparently Unwilling to Assume the Least Responsibility, but Determined to Secure Credit for Any Movement that Led to the Destruction of the Cervera Ships-Messages Which Tell a Convincing Story.

The Chicago Tribune prints the following copies of the telegrams which passed between Secretary Long, Admiral Sampson, and Admiral Schley in connection with the question as to whether Schley obeyed orders. They were secured in some manner by a reader of the Tribune:

(Sampson to Schley, May 19, 1898.) It is unnecessary for me to say that you should establish a blockade at Clenfuegos with the least possible delay, and that it should be maintained as close as possible.

On the same day Secretary Long tele graphed Sampson the following message, which was received by Sampson on May
